

# Traffic Plan

TRAFFIC CONTROL SERVICES

Partners in progress.  
United by purpose.

## More Than a Safety Company

When it comes to traffic control and protecting our customers and the traveling public, safety should be the standard we are all measured by, not something that sets us apart.

So while we've got safety covered, at Traffic Plan we see the bigger picture too. The reason we keep everyone safe? Progress. We protect our customers and the traveling public while our communities and infrastructure are not only maintained but improved for a brighter future.

But we're more than just traffic control. Traffic Plan can help you with:

### **Traffic Plan** TRAFFIC CONTROL SERVICES

- Standard State and Local Roadway Packages
- Multi-Lane Highway Packages
- Traffic Control MOT Site Plans
- Emergency 24/7 Response

### **Traffic Plan** EQUIPMENT SALES & RENTALS

- Intelligent Transportation Systems

### **Traffic Plan** PROGRESS INSTITUTE

- Employees
- Customers

## Safety Leads Us To Tomorrow, Tomorrow Leads to Progress

Our commitment to a culture of safety starts with our very own Progress Institute, where our workforce is trained. Educating our field crews to meet the needs of the traffic control industry is a thoughtful process. In response, we have created a progressive agenda that provides our crews with the proper tools and knowledge to feel confident in their performance as we protect the people we serve. Our Progress Institute training goes beyond industry standards to include:

- ATSSA Standard Basic Flagging Certification
- Intermediate VDOT Work Zone Traffic Control (Specific to VA)
- TMA Driving Standards & Nomenclature
- Advanced Technician Training
- Advanced Crew Chief Training
- Advanced Highway Training, Including Publication 213 (Specific to PA)

And because you depend on us, we have one of the highest ratios of field managers to crew members in the business. This ensures that your work zone is set up right and run right—no excuses. More than 80 percent of our field managers are former law enforcement officers, who know the meaning of and take pride in protecting and serving the community.

At Traffic Plan, we're committed to making sure everyone arrives home safely. If you're interested in having your own employees learn the value of work zone safety and traffic control, contact us today to enroll your team in the Progress Institute.

## Dependability at Every Step

From our Rapid Plan service, to all the equipment you need, to experienced field crews and advanced management teams, Traffic Plan has you covered. We understand the demands and requirements of establishing safe work zone setups in the Mid-Atlantic region. One call, one supplier, one solution.

# When the Weather Is Uncertain, You Can Be Certain of Us

You can't predict the weather, but you can rely on Traffic Plan to be there when Mother Nature disrupts our everyday lives. On call and on-site is where you'll find us, leading the way to securing the area and protecting your crews so we can keep the country moving together.

**Service 24/7/365. It's what you need, and it's what we deliver.**

# Leadership Built on Equality and Progressive Thinking

Traffic Plan is proud to be certified by the Women's Business Enterprise National Council. Founded and run by Carolyn and Mary Kiely, our business is focused on achieving the highest safety standards and helping our customers fulfill their missions of maintaining and improving the infrastructure of our communities.

Through the vision of Carolyn and Mary, Traffic Plan is committed to helping our customers, our employees, and everyone we encounter to realize their potential and positively impact the towns and cities we live and work in.

**Partners in progress. United by purpose.**

It's not just a slogan, it's a promise.
